# APAC Investors: The Steady Rise of ESG

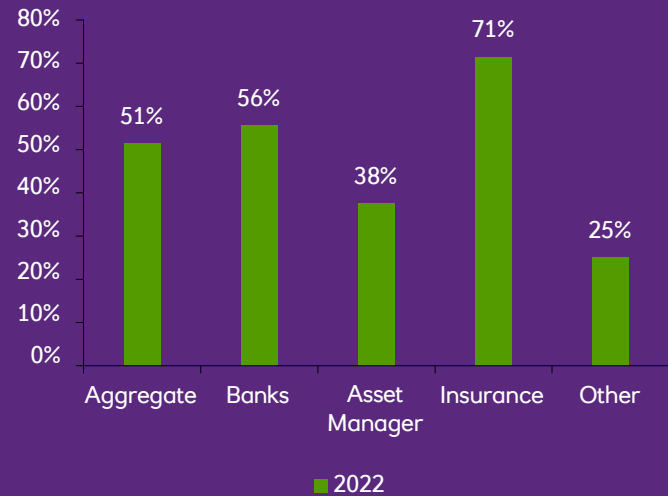

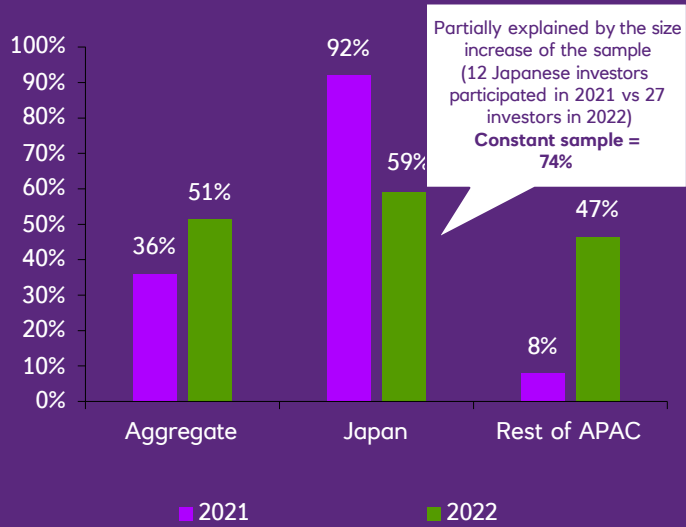

TOMORROW  
BEGINS TODAY

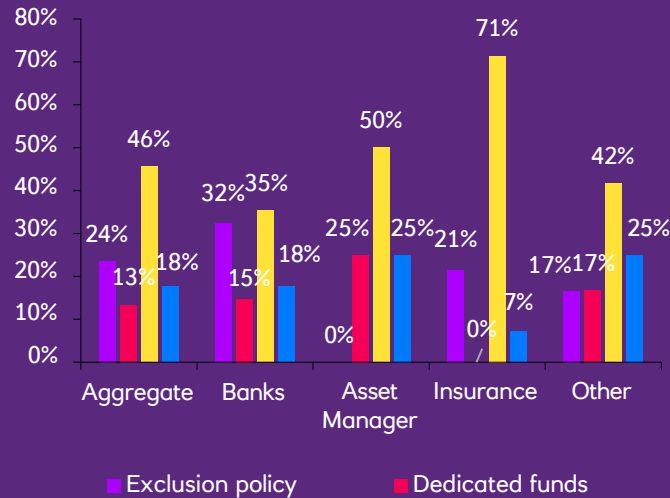

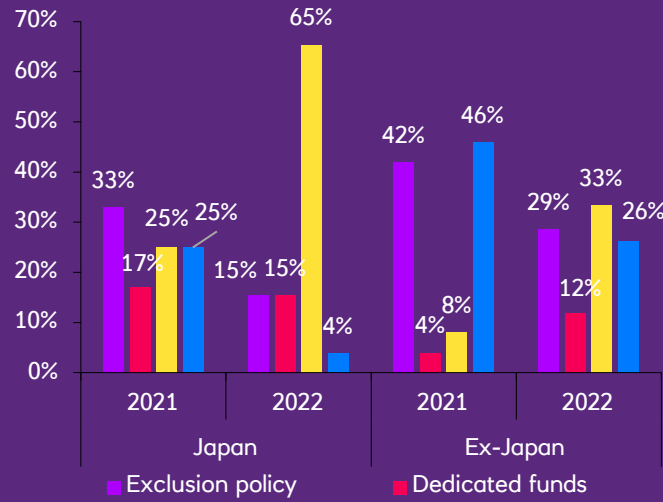

NatWest

# ESG Practices

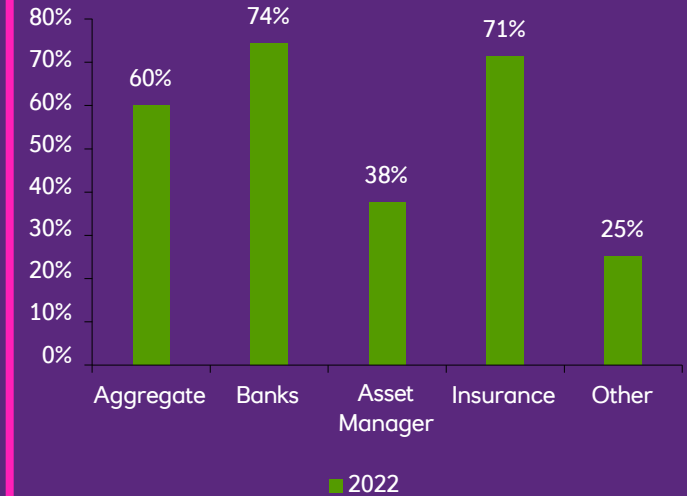

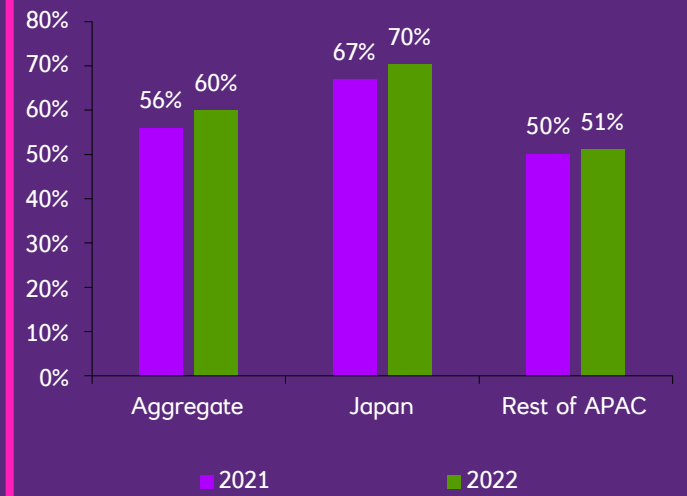

## Do you publish an ESG report? (%yes)

## What is your ESG strategy?

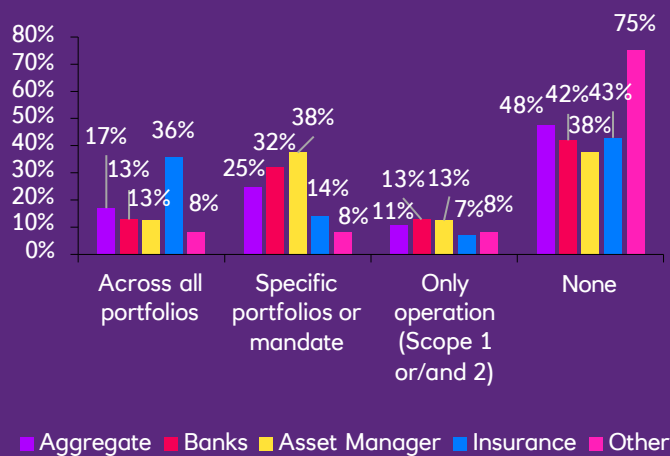

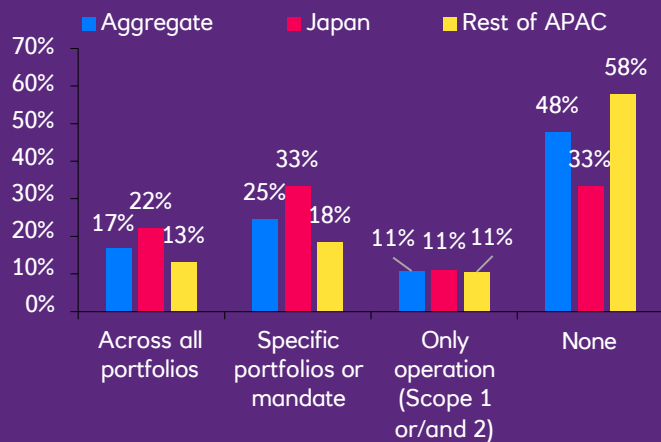

## Do you actively engage with borrowers on ESG? (% yes)

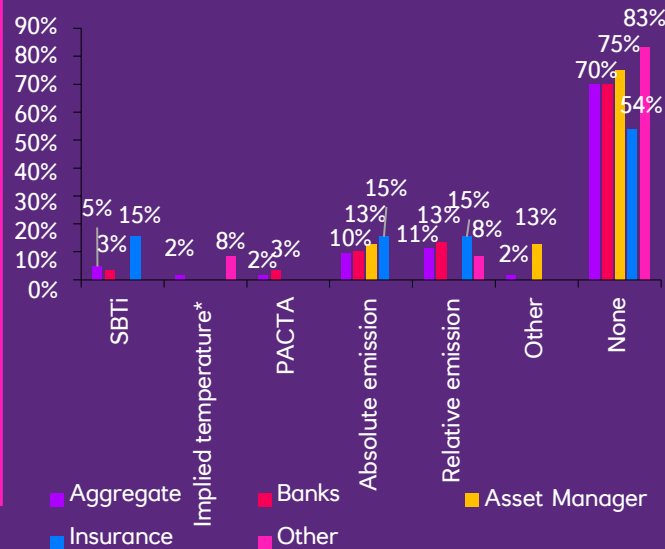

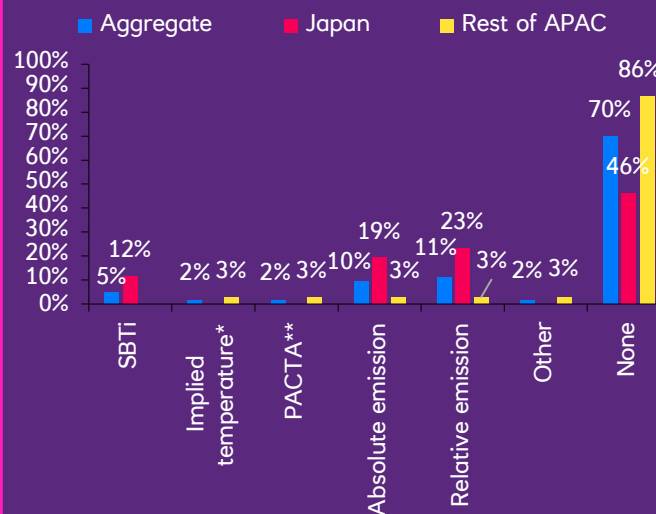

# Climate & Barriers

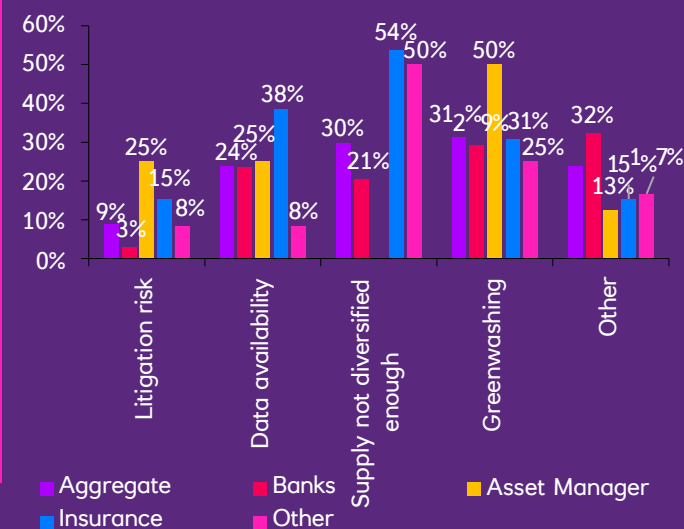

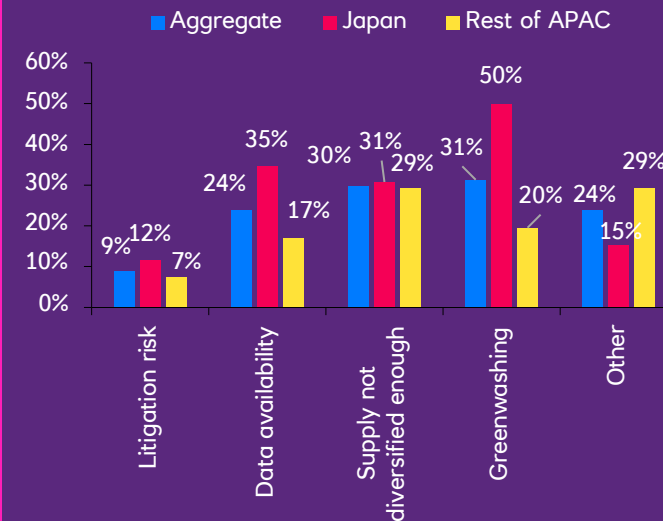

## Do you measure the carbon footprint of your investments/operations?

## Have you set decarbonisation targets for your portfolios?

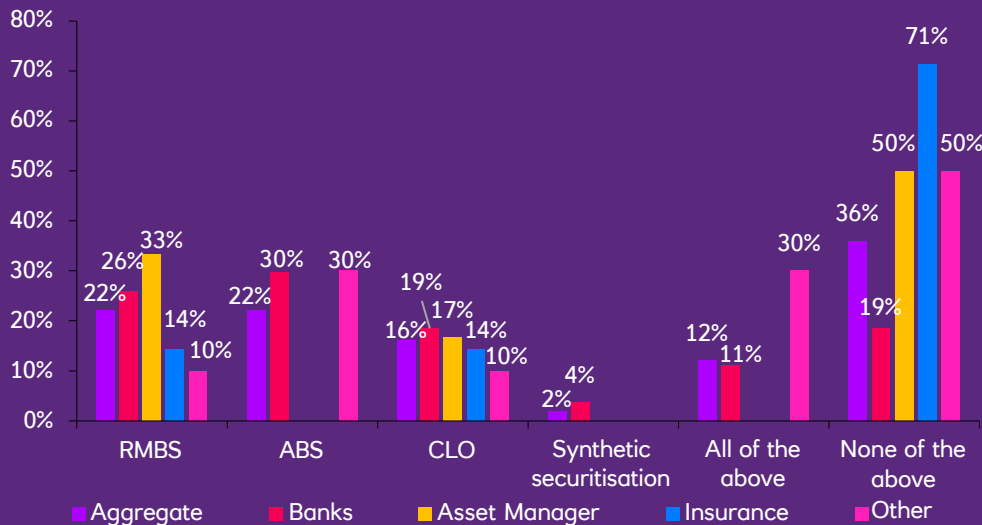

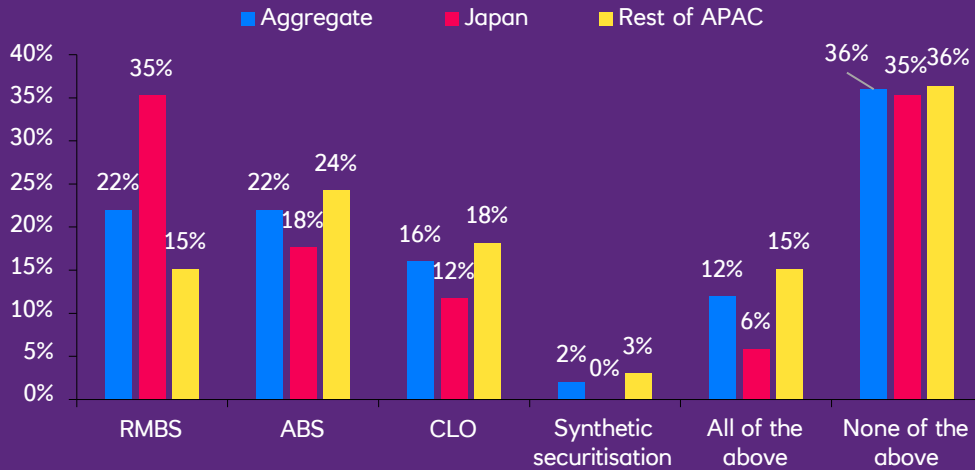

## What is the biggest challenge for ESG investing in the Asian market?

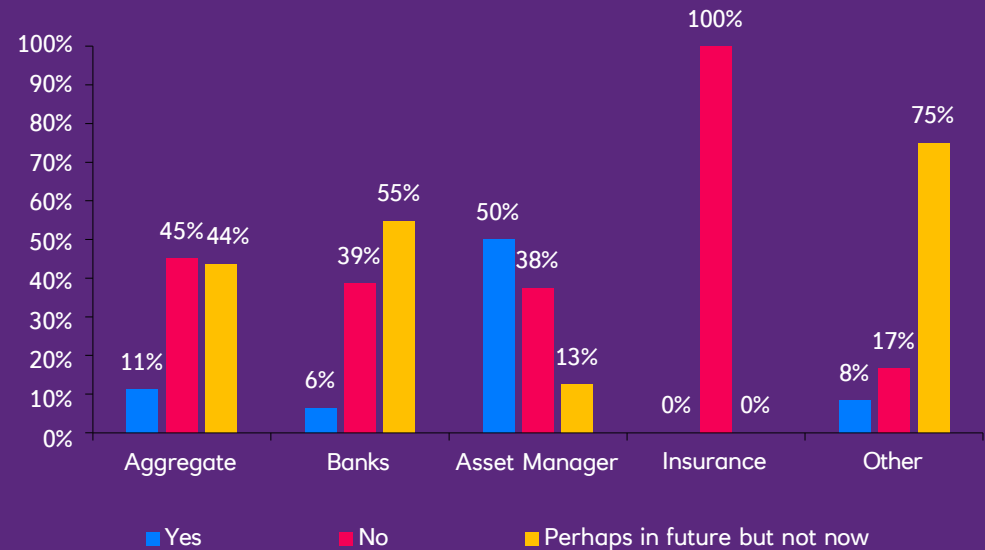

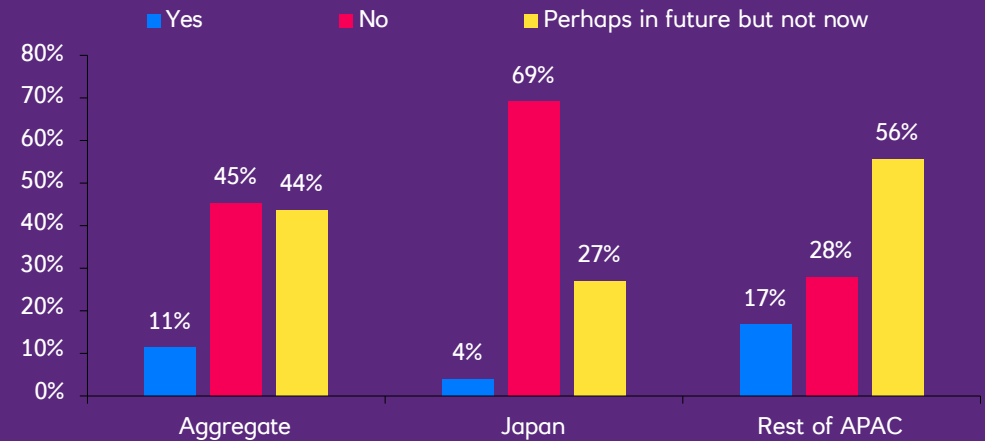

Notes: \*Implied Temperature is designed to show the temperature alignment of companies, portfolios and funds with global temperature goals. \*\*The Paris Agreement Capital Transition Assessment (PACTA) is a free, open-source methodology and tool, which measures financial portfolios' alignment with various climate scenarios consistent with the Paris Agreement. # Product Development

In which ESG securitisation products would you be interested?

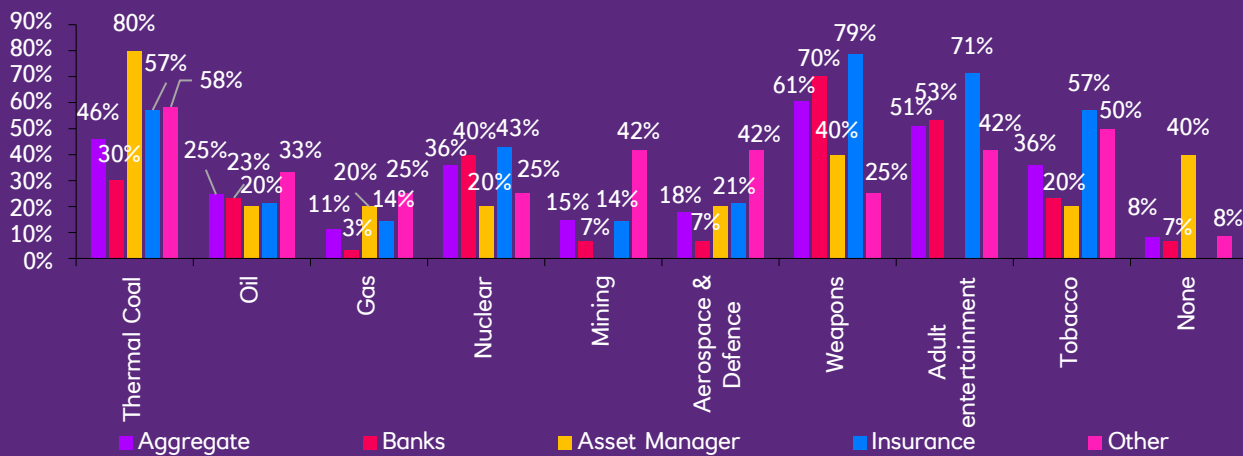

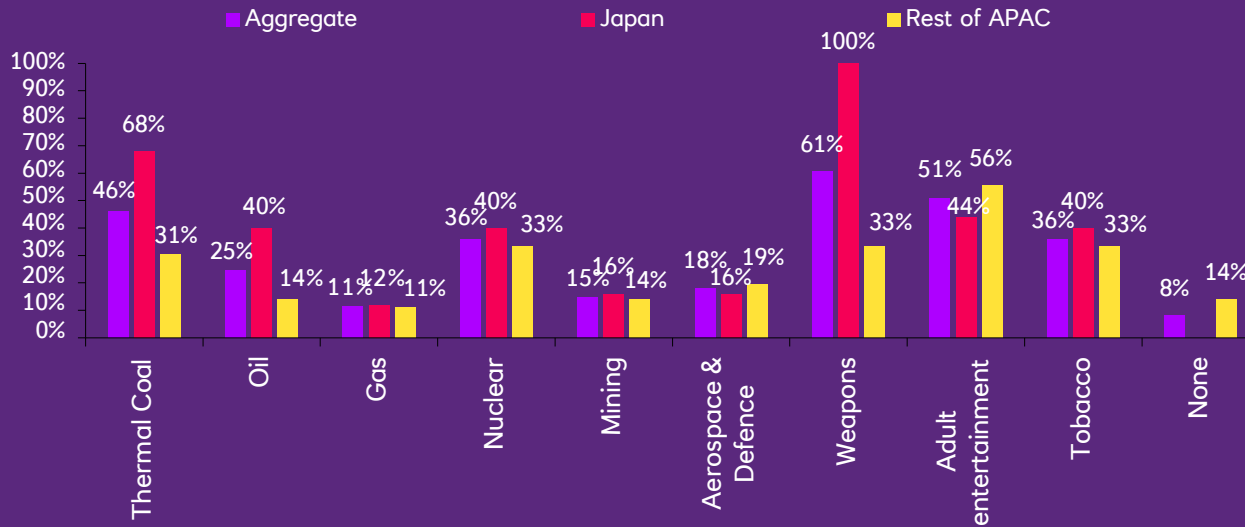

Would you be open to considering a two-way pricing mechanism for sustainability-linked instruments (i.e. including a step-down, as well as a step-up dependent on whether SPTs are met)?

# Exclusion Policies

What sectors are captured by exclusion policies?

Are there plans or discussions to broaden or expand (i.e. tighten criteria) exclusion policies? (%yes)
