

KEY INVESTOR INFORMATION

This document provides you with key investor information about the Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in the Fund. You are advised to read it so you can make an informed decision about whether to invest.

Managed Income Fund, a sub-fund of the RBS Investment Funds ICVC (Income share class I ISIN: GB00BGWKS68)

The Fund is managed by RBS Collective Investment Funds Limited.

OBJECTIVES AND INVESTMENT POLICY

The Fund aims to provide a regular income, with some potential for growth over the long term.

The current policy of the Fund is to achieve a broad exposure to diversified investments in the UK and overseas, including equity shares and bonds. The Fund will do this by investing in a range of other funds and directly in bonds and equity shares with allocations determined by the Investment Manager. The Fund also has the potential to invest in alternative asset classes including property and alternative investment funds. The Fund will be managed relative to the Benchmark shown. The Investment Manager will manage the risk profile of the Fund via divergence from the Benchmark within an agreed Tracking Error of 4%.

Managing the Fund in this way will constrain the extent to which the Fund's performance differs from that of the Benchmark and therefore limit the potential return - both above and below the Benchmark return.

This is an active fund which means the investment manager makes the decisions about how to invest the Fund's money. These investment decisions will always be made within the constraints of the Fund's objectives and investment policy. The benchmark is used to constrain the risk of the Fund but the Investment Manager will choose the assets held and does not aim to track the benchmark.

The Benchmark has been selected to determine the level of risk for the Fund. Indices used within the Benchmark to represent particular asset classes have been chosen to provide an appropriate representation of those asset classes and due to the data being made available from the Index Provider at a reasonable cost.

For liquidity management purposes the Fund may also invest in cash instruments, deposits and cash funds.

The Fund may also use Derivatives for Efficient Portfolio Management purposes. Funds in which the Fund invests may also invest in Derivatives for investment purposes as well as for Efficient Portfolio Management purposes.

Asset Class	Benchmark	Weight
Government Bonds	Bloomberg Barclays Sterling Gilts TR Index Value GBP	5%
Investment Grade Corporate Bonds	Bloomberg Barclays Global Aggregate Credit, TR Index Value Hedged GBP	30%
High Yield Bonds	Bloomberg Barclays Global High Yield TR Index Value Hedged GBP	30%
UK Equity shares	MSCI United Kingdom Index GBP	25%
Global ex UK Equity shares	MSCI ACWI Ex-UK Index GBP	10%

You may normally sell your shares in the Fund on each Business Day. Requests to sell received and accepted by 3pm on a Business Day will be dealt at the price calculated on that Business Day.

The Fund issues both Accumulation and Income shares. If you hold Income Shares you can choose to have your distribution of income paid directly to your bank or building society current account. Alternatively, you may choose to have income distributions automatically reinvested, to purchase further shares of the same Class and Fund.

The Fund is designed for retail customers with little or no experience of investing in collective investment schemes and basic or no knowledge of the characteristics and risks of investing in bonds (capital markets).

A typical investor in the Fund has a medium tolerance for risk; they accept that the value of their investment may fluctuate and they have a medium tolerance to bear losses to their capital. The minimum investment horizon is 5 years.

RISK AND REWARD PROFILE

These ratings indicate how the Fund may perform and the risk of losing some or all of your capital. Generally the potential for higher gains also means a higher risk of losses. The lowest rating does not mean a risk free investment.

The Fund is ranked at 4 because funds of this type have experienced average rises and falls in value in the past. The risk and reward category for the Fund is not guaranteed to remain unchanged, and may shift over time.

Historical data, such as is used for calculating the rating, may not be a reliable indication of the future risk profile of the Fund.

The following risk factors contribute to the overall risk and reward indicator:

1. We take some or all of the annual management charge from capital. Because of this, your capital may be reduced over time if the

Fund's growth doesn't compensate for it. Also, any capital growth the Fund produces will be reduced by the charges.

2. The Fund will invest principally in UK and overseas bonds so changes in interest rates or the credit rating of companies issuing such bonds will affect Fund performance and income paid. The solvency of organisations in which the Fund invests can change and this can affect the Fund's capital and any income paid.

3. As the Fund holds fixed interest securities the level of income that the Fund provides will often vary from one payment to another. In addition, the share price and income from the Fund will rise and fall due to movements in interest rates and inflation.

4. The Fund invests in company stocks and shares and their value depends on the financial state of the underlying companies. Any fall in the financial outlook for, or failure of, such companies can reduce this Fund's share price and the income that it pays.

5. The Fund invests in overseas investments and the share price will go up and down in line with movements in exchange rates as well as the changes in value of the Fund's holdings.

6. The Fund may have some investment in property via funds or property company shares. The valuation of property is generally a matter of valuer's opinion rather than fact. Property may sell for less than it is valued at, which would then reduce the Fund's share price.

CHARGES

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested or paid out	
Charges taken from the Fund over a year	
Ongoing charge	1.30%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it, but not the costs of any advice you have been given. These charges reduce the growth of your investment.

Any entry and exit charges shown are maximum figures, and in some cases investors may pay less.

The ongoing charges figure would ordinarily be based on expenses incurred in the previous financial year ending 28 February 2020. Allowance has been made for a reduction in the Annual Management Charge payable to the ACD with effect from 1 January 2021 and therefore the ongoing charges figure has been estimated. The ongoing charge figure may vary from year to year.

The ongoing charges figure for this Fund is capped at 1.30%.

The ongoing charges figure excludes portfolio transaction costs.

For more information about charges, please see the Fees and Expenses section of the Fund's Prospectus.

PAST PERFORMANCE

This chart shows how much the Fund increased or decreased in value as a percentage in each year, alongside its benchmark.

Performance for the Fund has been calculated in Pounds Sterling and takes account of ongoing charges, but excludes entry and exit charges. Performance for the benchmark is based on Index returns and so does not allow for any charges.

The Fund and the share class was launched in 2019. Past performance is not a reliable guide to future performance.

PRACTICAL INFORMATION

The Depositary for the Fund is The Bank of New York Mellon (International) Limited who are responsible for the safekeeping of the Fund's assets and ensuring the Fund is managed in accordance with FCA rules.
